

Ring size guide

Print this template in A4 size.

Check the correct scale of the ring, make sure when printing this document the bottom line measures exactly 5 centimeters.

To check the size you need:

1. Take a ring similar to shape/size you want to wear, sizes can vary between a thicker model to a thinner one. If you want to wear multiple rings on the same finger, the rings should be larger than the one you usually wear.
2. Place the ring on the circle that is the best closest match of the inside diameter measurement.
3. I recommend to check several sizes to make sure which one is the best size you need.
